
Gate-6B Stage 11: Whole-Domain Sizing Demand vs Spatial Mesh Response
Demonstrates native $\eta_e > 1.0\%$ across entire specimen driving domain-wide refinement (57,929 elements)
(a) Coarse MISESERI Error Indicator Field η_e
(b) Native 1% Adapted Element Sizing h_{eq} (μm)
Initial Crack (a0=0.5 mm)
Position x (mm)
Position y (mm)
Normalized Discretization Error η_e
Equivalent Element Size h_{eq} (μm)
