Gate-6B Stage 11: Spatial Transect Profiles of Error Indicator and Resulting Mesh Sizing
Demonstrates that far-field η_e remains $>1.0\%$, directly prescribing $h \approx 3\text{--}6\,\mu$m across entire height

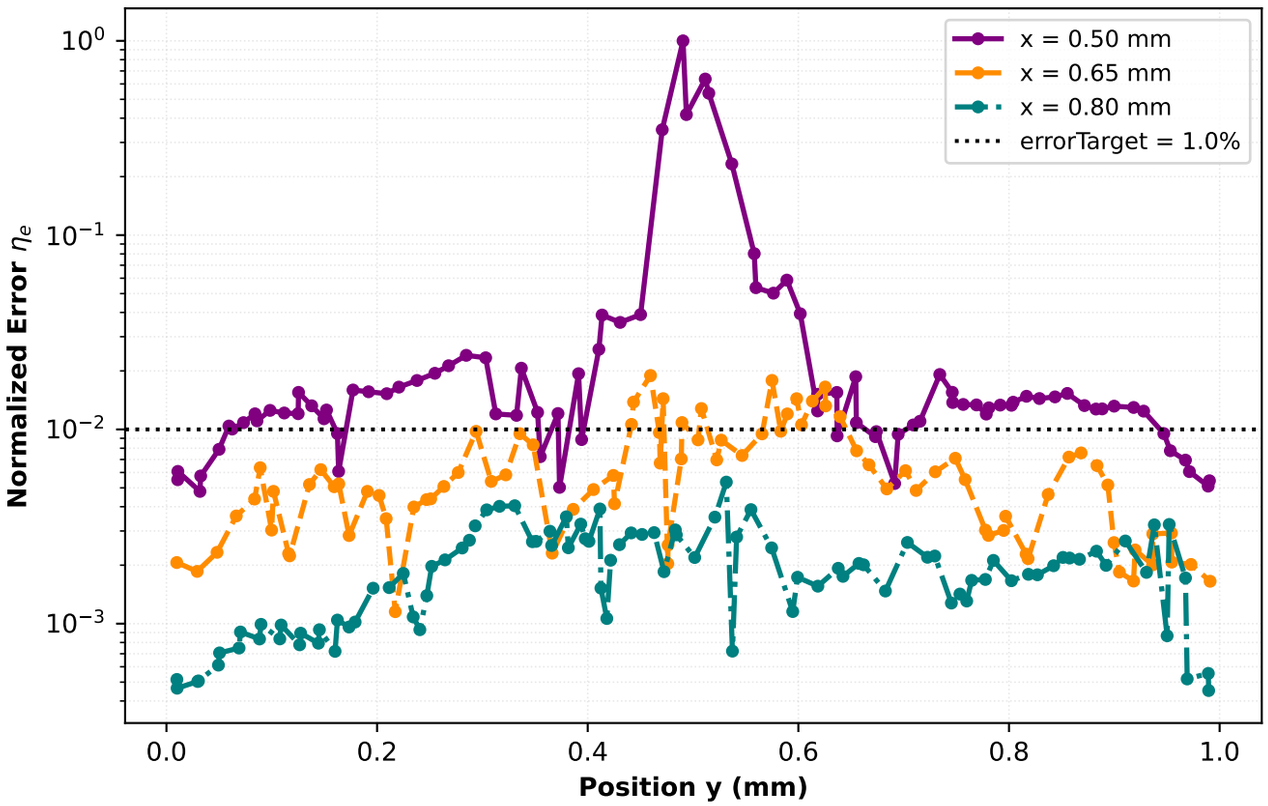

(a) Horizontal Profiles: Error Indicator $\eta_e(x)$

(b) Horizontal Profiles: Adapted Sizing $h_{eq}(x)$

(c) Vertical Profiles: Error Indicator $\eta_e(y)$

(d) Vertical Profiles: Adapted Sizing $h_{eq}(y)$
