

# Temporal Discretization Scaling of Global Energy Components ( $T_1$ -- $T_3$ on Fixed $S_1$ Mesh)

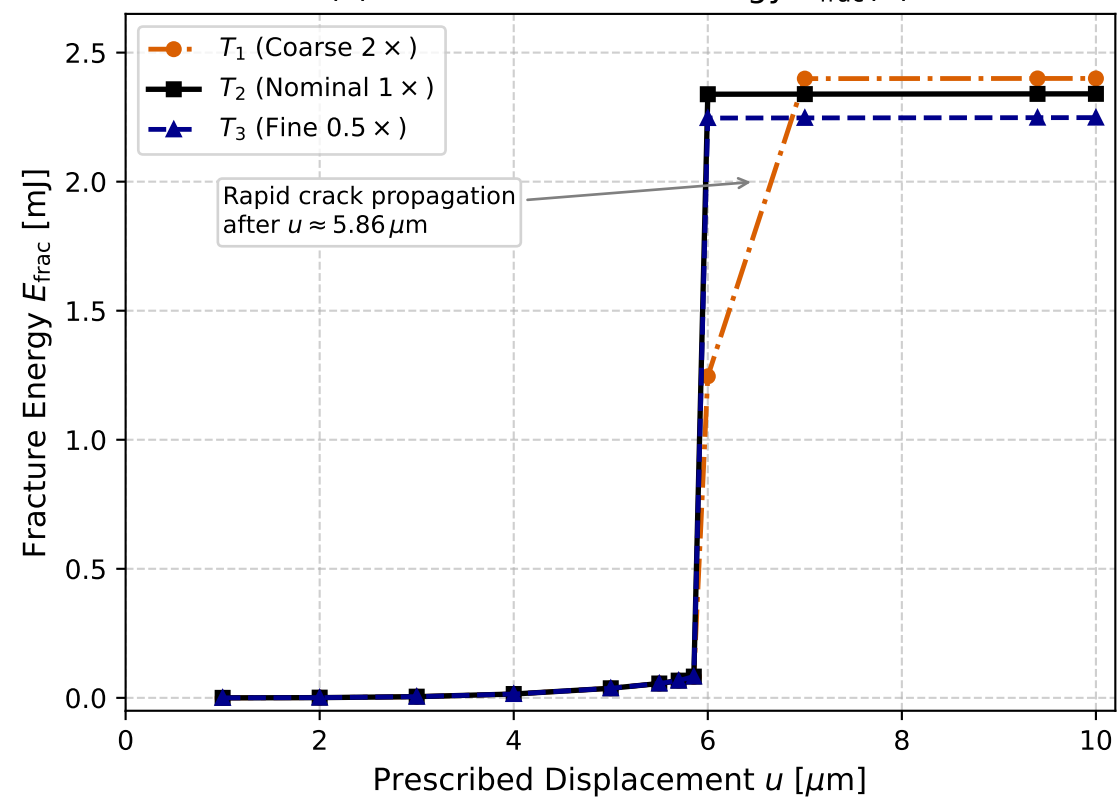

(a) Boundary Work Evolution  $W_{\text{trap}}(u)$

(b) Stored Elastic Strain Energy  $E_{\text{elas}}(u)$

(c) Fracture Surface Energy  $E_{\text{frac}}(u)$

(d) Two-Term Bookkeeping Diff  $\mathcal{R}_{\text{book}} \equiv W_{\text{trap}} - (E_{\text{elas}} + E_{\text{frac}})$
