

Temporal Discretization Scaling of Global Energy Components (T_1 -- T_3 on Fixed S_1 Mesh)

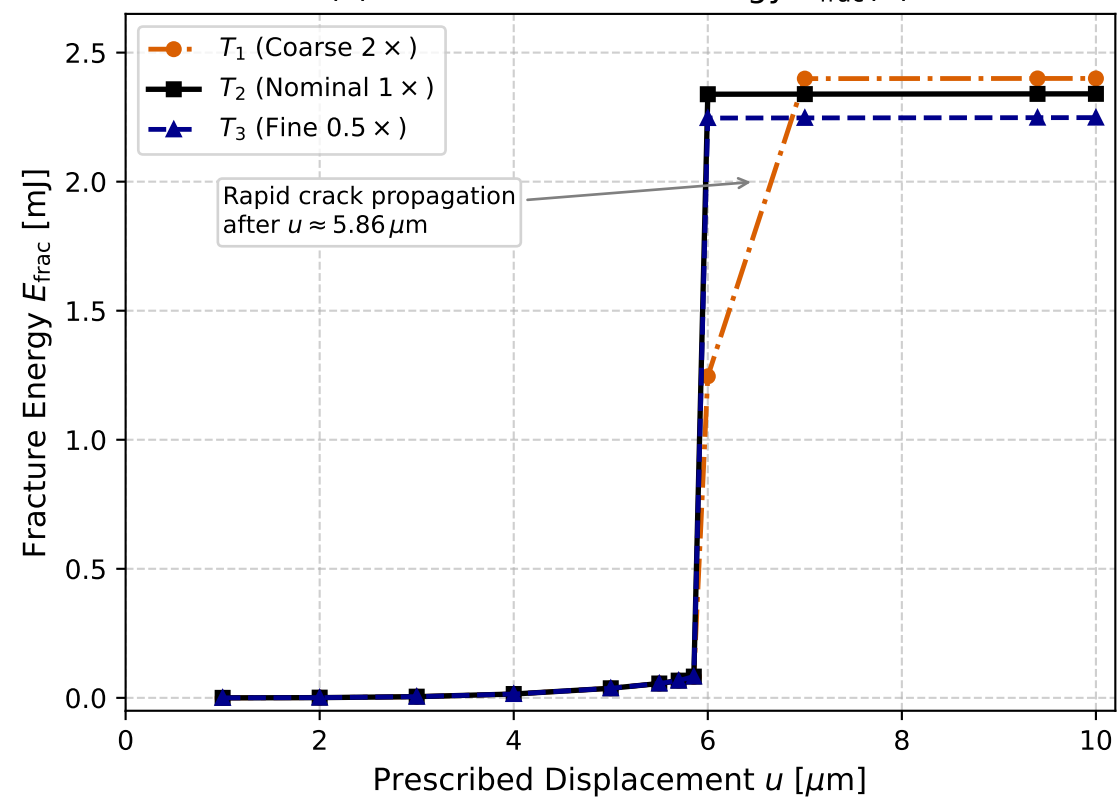

(a) Boundary Work Evolution $W_{\text{trap}}(u)$

(b) Stored Elastic Strain Energy $E_{\text{elas}}(u)$

(c) Fracture Surface Energy $E_{\text{frac}}(u)$

(d) Two-Term Bookkeeping Diff $\mathcal{R}_{\text{book}} \equiv W_{\text{trap}} - (E_{\text{elas}} + E_{\text{frac}})$
